INFORMATION FOR PATIENTS: Changes at Banbury Health Centre

As from 1 July, there will be some changes in how patients access GP and other appointments at Banbury Health Centre.

Oxfordshire Clinical Commissioning Group has been working with Banbury Health Centre staff and the Patient Participation Group (PPG) to develop these new arrangements. We know that the Banbury Health Centre site is highly valued by our local community and in a central location that benefits many patients.

Patients registered at Banbury Health Centre:

Registered patients at Banbury Health centre will continue to be able to see a GP at the Banbury Health Centre site.

There will be changes to some evening and weekend appointments at Banbury Health Centre for patients registered at the practice but patients should notice little difference. When you speak to a receptionist to make an appointment, they will advise you when the next available appointment is. Eventually, appointments available at Banbury Health Centre will be the same as for other GP practices across Banbury and the rest of Oxfordshire.

Patients Registered at other GP practices in Banbury:

As from 1 July, Banbury Health Centre will not be offering appointments to patients registered at other GP practices in Banbury. For these patients, if you need to see a GP or nurse urgently, contact your own GP surgery and they will make arrangements for you. If you need help when your own surgery is closed, please phone 111.
